

Pixel Studio FX

REVIEWED

By: Arunas Bruzas

What is Pixel Studio FX?

Pixel Studio FX creates amazing eCovers in minutes for all your projects! It's super fast and responsive. With hundreds of template covers to choose from, users can find the right cover for their type of content, in any niche. You just point, click and edit their template, and you're done! No need to hire a freelancer again as you can do it yourself in minutes

WHO IS IT FOR?

Pixel Studio FX has an immediate appeal for eBook and digital creators. Agencies too can use the software as a solution to save time and money. Multiple covers can be created with just a few clicks, including bundle shots, as well as individual e Covers.

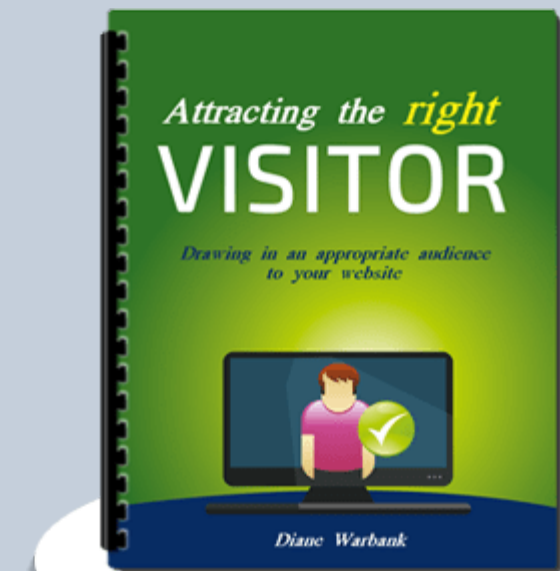

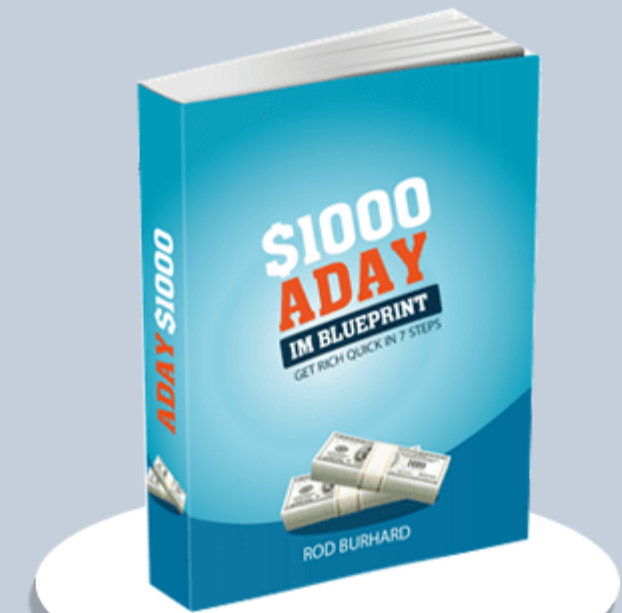

The software can also be appealing to freelancers looking to earn more with side projects. You can also use the software to create quick and attractive e Covers for your clients.

Authors too can eliminate hiring expensive graphic artists for every book they publish. Publishers and marketers who usually set goals of multiple published books per year can use Pixel Studio FX as a way to save money and even time.

With many automated processes such as royalty-free pictures integration, the software also simplifies what used to be a complicated process. You don't need Adobe, or any complicated software. It's dead easy to make e Covers with this software

SOFTWARE INTERFACE

Pixel Studio FX BENEFITS

Using an automated tool to create an eBook cover comes with unique advantages such as having the ability to compare multiple designs before publishing, saving time, and money!

Easy to use

Unlike many other professional programs, Pixel Studio FX is actually easy to use. You don't even need to watch any tutorials it's that simple.

Thousands of templates

With more than 5000 templates to choose from, each published book can have its own identity. Combining various images also leads to even more possible covers.

Multiple rendering formats

Preview options are available for all books. Publisher get to see exactly what readers would see with a published cover.

Included preview modes

With no grids and edit toolbars, the preview mode offers an overall perspective of the entire project. It can be used as a reference after every cover edit in order to reach the desired result.

3-minute covers

Most programs require considerable amounts of time for an eBook cover. Even days can be spent developing the perfect cover. But this is not the case with Pixel Studio FX. You'll be able to create an amazing looking e Cover within 3 minutes

Works with personal images

While royalty-free images are great, personal photos can also be uploaded to the program to create a distinct cover

Pixel Studio FX FEATURES

Pixel Studio FX is ready for all the challenges of modern e Cover creation. It is up to date with the latest features needed to make all digital representations of your book (or digital product) stand out and sell like crazy!

5,326 eCover templates

With thousands of templates to choose from, Pixel Studio FX doubled the number of options users have to create their eCovers. With additional edits and changes, they can become even more numerous

HD graphics

Sharp graphics are important for quality results. High quality gives your product a premium feel and value. People do judge a book by its cover!

High-quality background

Backgrounds can add character to e Covers. They can represent one of the best solutions for a visual impact.

One-click colorization

With more than 5000 templates to choose from, each published book can have its own identity. Combining various images also leads to even more possible covers.

Stock photo integration

There's no need to spend hours browsing Pixabay, Shutterstock, Getty Images, Iconfinder or Pexels for the right royalty free picture. This can be done directly from Pixel Studio FX. In fact, they have hundreds of stock images for you to use in-built, so you'll save tons of money right there

UNIQUE FEATURES

If the previous features are enough to publish any type of cover, there are unique characteristics to take the entire experience further. Users have access to advanced tools which are similar to what is seen in the most expensive programs on the market.

Included search function

Looking for shapes and symbols can be complicated when there are thousands of them. The search functionality is improved with the use of keywords to find the right objects, images and icons for your eCover.

Watermark

This is great if you're creating e Covers for clients. You can now watermark any e cover prior to sending it to a client for review! Once they pay, you can remove the watermark and send them the original file! Great for extra income every month.

10x more storage space

With more than 5000 templates to choose from, each published book can have its own identity. Combining various images also leads to even more possible covers.

300 unique fonts

The right title and ebook keywords can be highlighted with quality fonts. There are over 300 fonts to choose from.

PROS & CONS

Pros

- ✓ Create eCovers in minute
- ✓ No learning curve
- ✓ Saves time and money
- ✓ Recommended for commercial purposes
- ✓ Included royalty-free pictures
- ✓ 300 distinct fonts to consider
- ✓ Doubled storage space for multiple covers
- ✓ HD quality graphics
- ✓ Files save as PNG., JPG, PDF, and TIFF
- ✓ Instant client feedback tool

Cons

- ✗ Some personal photos need editing before uploads
- ✗ Need more images for smaller niches, but you can search stock sites that are integrated

TESTIMONIALS

I'm completely LOST FOR WORDS. When I heard about Pixel Studio FX and what they were trying to do with custom graphics covers... I said NOPE.... you can't compete with Photoshop. Then when I started using the software I realized I ate my words. This is AMAZING. The bar has been raised...

Chad

I used to do my own book covers in Photoshop ... then, I discovered Pixel Studio FX. Not only can I create my book covers faster but I can actually also do them much better because of the tools and library they provide. ... and I redesigned many of my previous books covers with Pixel Studio FX ... Plus, it's way cheaper than Photoshop and a thousand times easier to learn to use.

Mitchell

I've personally used Pixel Studio FX and have to say I loved it. I'll be recommending this to everyone with a 10/10. It really is an essential tool in every marketer's arsenal. It will personally save (and make me) thousands of dollars.

Michael

This is one of my best software that I purchased. I used it a lot and I created many e covers for PDF, audio, video etc. It's very easy to use and with a great result. I love it!

Claudio

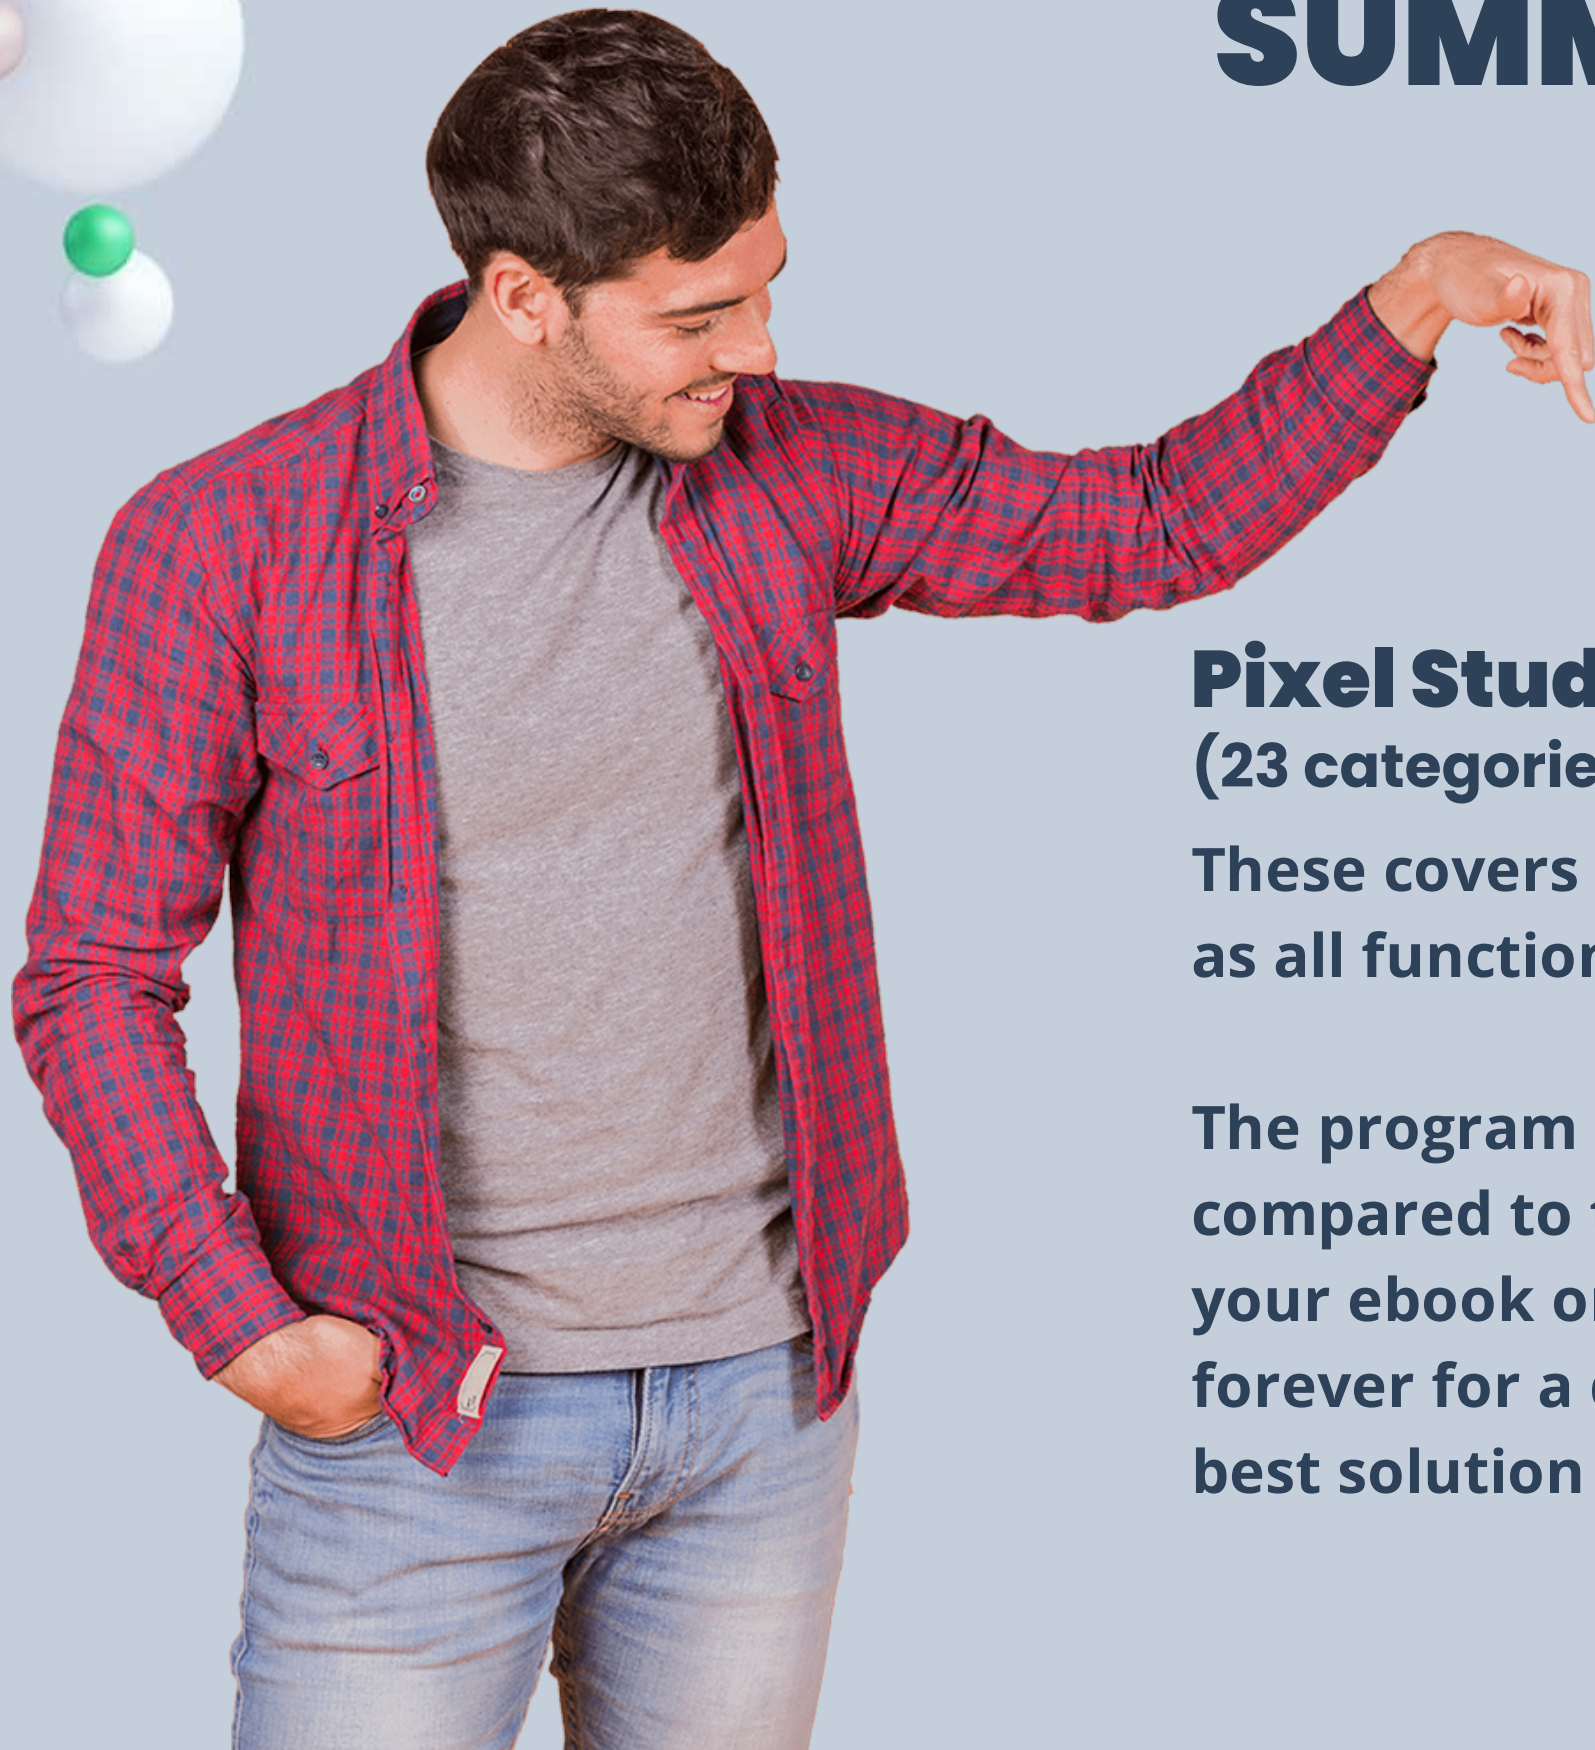

SUMMARY

Pixel Studio FX offer THOUSANDS of possible covers in (23 categories!)

These covers can easily be created in minutes and there's no learning curve as all functions are intuitive and easy to use.

The program comes with more templates and increased storage space compared to the previous release. If you're looking to create e Covers for your ebook or digital product, and want to do it quickly, without waiting forever for a designer, or spending hundreds of dollars, then this is the best solution for making high quality e Covers in minutes!

OUR VERDICT

4.7 OUT OF 5

With it's easy of use and amazing templates which cannot be matched by other graphic software tools, we highly recommend Pixel Studio FX to create ALL your e Covers, for any project, in any niche.

Whether you need an e Cover to represent your eBook, report, video course or even software, this is best tool we recommend for creating instant e Covers that look a million dollars.
